

Semiconductor Talent Incubation Program Taiwan

A Joint Initiative of the Federal Ministry of Research, Technology and Space, Saxon State Ministry for Science, Culture and Tourism, TUD|Dresden University of Technology, and TSMC

What we offer

The Semiconductor Talent Incubation Program Taiwan (STIPT) combines academic study with hands-on experience in Taiwan – the global hub of the semiconductor industry.

STIPT offers students of engineering and the natural sciences semiconductor courses geared towards real-world applications at a renowned Taiwanese university, followed by practical training at TSMC, one of the world's leading semiconductor companies.

During the six-month program, you will gain insights into cutting-edge semiconductor technologies and production processes while developing valuable skills for your future career.

Financial support includes a monthly allowance and travel subsidy.

Detailed information

Details on how to apply, eligibility criteria and deadlines can be found on our website or by scanning the QR Code

↗ leo.tu-dresden.de/stipt

Your profile

You are enrolled at a German university and are either

- a Master's student or
- a Bachelor's or Diplom student (from the 2nd semester onwards)

You should have English proficiency at the B2 level (CEFR) and a grade point average of at least 2.3 on your current transcript (TOR).

This program is open to students who pursue a degree in STEM subjects. Eligible fields of study include, but are not limited to

- Electrical Engineering
- Microelectronics
- Nanoelectronics
- Materials Science
- Mechatronics
- Mechanical Engineering
- Equipment Engineering
- Automation Technology / Automation Engineering
- Robotics
- Sensor Technology
- Physics
- Chemistry

Contact

For questions about the program including application procedure, required qualifications, housing and finances, please contact
